

Figure 4: Hours Worked among All Adults (Aged 15+) by Country Income

(a) Weekly Hours per Adult

(b) Employment Rate

(c) Weekly Hours per Worker

*Notes:* The figure depicts average weekly hours of work per adult (aged 15+) in panel (a), employment rates per adult in panel (b), and weekly hours of work per worker in panel (c) against log GDP per adult in 2023 PPP USD. For each country, we use the most recent labor force survey available (generally 2022-2023 or 2019 as we exclude COVID years whenever possible, see Appendix Table A.9). Each circle's area is proportional to its adult population; the largest countries' names are depicted. Colors correspond to world regions as depicted in Figure A.2. The best quadratic fit of the weighted circles is represented by the dashed curve. Panel (a) shows a bell shape of hours of work per adult with development. Panel (b) shows overall stability of the employment rate with development and panel (c) shows a bell shape of hours per worker, with a substantial decline for higher income countries.
